*Vecoplan to inform visitors about the treatment of plastic waste at European trade fairs:*

## **“Purpose driven on recycling”**

**Vecoplan will present its shredding, storage and conveying solutions at the PRS, Plastpol and Equiplast international recycling trade fairs in May and June. These solutions enable different materials to be processed into high-quality output. Vecoplan will also show the powerful VIZ 1300 at Plastpol. Users of this machine enjoy a high level of availability, low operating costs and maximum throughput.**

Vecoplan’s focus at the European trade fairs will be on successful concepts in plastics recycling. The Westerwald company not only offers know-how, it also supplies machinery and plants for shredding, conveying and processing primary and secondary raw materials. Trade show visitors will see how the loop can be closed and plastics cost-effectively recycled. Highly efficient shredders are vital for closed loop recycling to function perfectly. With their ability to process a wide range of materials, the VIZ machines provide users with an outstanding solution for all input materials.

Vecoplan will demonstrate this at the PRS Plastics Recycling Show Europe in Amsterdam from 10-11 May. The European Trade Fair for the Plastics Recycling Industry has meanwhile become one of the most important industry events. It is organised by the Association of Plastic Recyclers in Europe, which includes many major companies. The machine manufacturer will focus on the processing of different plastics in Stand D50. The shredding solutions shred almost all plastic residues to the required output quality and prepare them for downstream processes.

Plastpol will be held in Kielce, Poland, from 23-26 May. It is one of the leading international trade shows, with more than 900 international exhibitors – around half of whom are from abroad – and nearly 20,000 expected visitors. In Stand 36 in Hall D, Vecoplan will present the VIZ 1300 high-performance shredder, a particularly energy-efficient shredder from the company’s product portfolio. The VIZ in the trade show stand will be equipped with the HiTorc drive, which has a high level of start-up power and a powerful torque. The Vecoplan

development team has built the VIZ series modularly in accordance with the new industrial design. This offers Vecoplan a wide range of options for configuring the machine and adapting it to the task at hand – a decisive factor that determines the performance and quality of the shredding process.

With around 19,000 visitors and almost 150 exhibitors, Equiplast (30 May–2 June in Barcelona) is an industry mainstay. At the show in Hall P3, Stand F47, Vecoplan will demonstrate its expertise as a solution provider for mechanical processing, for both in-house and post-consumer waste.

**Vecoplan at PRS: Stand D50**

**Vecoplan at Plastpol: Hall D, Stand 36**

**Vecoplan at Equiplast: Hall P3, Stand F47**

**Meta-Title:** Vecoplan to inform visitors to European trade fairs about the processing of plastic waste.

**Meta-Description:** Vecoplan will inform visitors about efficient plastics recycling at PRS in Amsterdam at Stand D50, at Plastpol at Stand 36 in Hall D and at Equiplast at Stand F47 in Hall P3.

**Keywords:** Vecoplan; PRS; Plastpol; Equiplast; plastics recycling; shredding; processing; plastic waste; VIZ 1300; Vecoplan high-performance shredder

**LinkedIn:** How can you efficiently process plastic waste into high-quality output? We will demonstrate this at the international PRS, Plastpol and Equiplast trade fairs in Amsterdam, Kielce and Barcelona. We will not only demonstrate our competence as a solution provider, we will also inform you about our shredding, storage and conveying solutions. We will also demonstrate the powerful VIZ 1300 at Plastpol. This shredder will give you a high level of availability, low operating costs and maximum throughput. We're looking forward to welcoming you!

**Captions:**

Vecoplan's experts provide on-site advice for all processing components in the recycling industry: Crushing, conveying, storage, separation.
