

PULP- AND PAPER INDUSTRY

THE WEST COAST PAPER INDIA

SCOPE OF SUPPLY:

- 2 drum chippers VTH 125/45/11
- 2 screening machines VSS 90/5
- 2 metal detectors MSG 1300
- 1 hammer mill HR 105 /45

THROUGHPUT CAPACITY:

Each chipping line 50 tons/hour

In 2006 we have been able to finalize the long term negotiations successfully with the company West Coast Paper and we were ordered to supply 2 chipping lines for West Coast Paper in Dandeli. These are two chipping lines and each one is designed for a capacity of 50 tons/hour at a final chip size of 20-25 mm. Vecoplan supplied 2 drum chippers type VTH 125/45/11 each with 750 kW motor power. The complete scope of supply comprises the 2 drum chippers, the lay shaft for the locally supplied motor, the metal detectors, the screening machine separately for each line as well as

a re-chipper type 95/45 HR for the re-shredding of the oversized material after the screen. We have engineered the material feeding and the discharge of the chips completely. The corresponding conveyors have been supplied locally according to our documents
