*A global first! Vecoplan to exhibit its optimised shredding solution at IFAT:*

## **Made for demanding applications: the new all-rounder**

**Vecoplan, the specialist company for turnkey mechanical processing plants, will be exhibiting at IFAT 2022, the world's leading trade fair for water, sewage, waste and raw materials management. The event will take place in Munich from 30 May to 3 June. Visitors will get to see a fully revamped version of the proven VAZ shredder, featuring a highly flexible modular design.**

On its 270 m<sup>2</sup> booth site Vecoplan will be presenting a true world premiere. Besides fulfilling the latest standards in industrial design and offering attractive new features, the VAZ single-shaft shredder has a modular structure which makes it the right solution for a wide range of applications.

Vecoplan will also be exhibiting its VRZ series shredder. Its “ripper” is designed for demanding applications and requires very little maintenance. The key feature of this double-shaft shredder is its rotor. Instead of conventional cutting tools, it has sickle-shaped ripper teeth which safely break up and shred even bulky and soiled materials. The range of possible applications is huge: domestic & commercial waste, post-consumer waste and post-industrial waste. It can also pre-shred waste wood.

Another highlight at the booth will be the compact and powerful VEZ 3200. This RDF shredder is a brawny single-shaft machine that combines the best Vecoplan technologies. It is equipped with an almost maintenance-free HiTorc drive that is totally insensitive to extraneous material. The VEZ is extremely reliable and powerful. It can handle very difficult material flows with high impurity contents in both pre-shredding and single-stage shredding.

IFAT will also see Vecoplan presenting solutions for mechanical processing and material handling. Vecoplan supplies its customers with individual machines and systems for various mechanical processing procedures, but the company also delivers complex, complete plants. The specialist company optimises the material flow and matches the components, achieving high energy efficiency and cost-effectiveness along the entire processing line. Users benefit from comprehensive know-how and international project experience.

**Vecoplan at IFAT – Hall B5, Booth 229/328**

**Meta title:** IFAT 2022: Vecoplan will present a 100% optimised shredder.

**Meta description:** More flexibility – Vecoplan will present the fully optimised VAZ at IFAT. Users can now adapt the new, high-performance shredder to manage their specific tasks.

**Keywords:** Vecoplan; IFAT; VAZ; high-performance shredder; single-shaft shredder; processing technology; refuse-derived fuel; VEZ 3200; VRZ

**Image captions:**

**Image 1:** The VRZ is exceptionally robust and requires little maintenance. The shredder's stand-out feature is its rotor.

**Image 2:** Vecoplan supplies its customers with separation, storage and conveyor technology solutions.
